To find the value of a single unit and multiply to get the exact.	5.Operations on larger number (ex-A) 6.Rounding off estimation (Ex-A,B) 7.Unitary Method	*Students will be able to operate and do the functions of big digits. *They will be able to approximate any digit and express in nearest units *They may understand the price of one article in the market

HOLY CROSS SCHOOL, AGARTALA (ANNUAL)
SYLLABUS for 2023

Class :V..... Subject : MATHS

Theme : Operations on large numbers, time, data handling, average		
Learning Outcome : Describe place and face value of bigger numbers and their operations.To manage time in different situations.to handle a large amount of data. To find out the average of a particular figures.		
Key Concepts	Name of the book : Precise Mathematics Lessons:	Life Skills
<ul style="list-style-type: none"> *To construct examples to solve different problems of multiplication and division *To arrange time and find out the problems of time *To arrange and organise data *To find out the average 	<ul style="list-style-type: none"> 5.Operations On large numbers (ex-B,C) 20.Time -(ex-20-A,B,C) 21.Data Handling (ex-21-B,C) 11.Average 	<ul style="list-style-type: none"> *Students will learn how to deal with the bigger digits while multiplying and dividing *Students will understand the pictorial representation of data *To measure time and dividing into various units such as minutes hours etc *Students will learn the general value of group

Theme : Decimal fractions,Pattern		
Learning Outcome : Inter conversion of decimal fractions .Word problems involving addition ,subtraction etc.Different types of patterns to arrange the given data such as letter pattern,Number pattern etc		
Key Concepts	Name of the book : Precise Mathematics Lessons : 10,22	Life Skills
<ul style="list-style-type: none"> *Place value in the context of decimal fraction *Operations on decimal fractions *Arrangement of numbers and articles according to rule 	<ul style="list-style-type: none"> 10.Decimal Fractions 22.Pattern 	<ul style="list-style-type: none"> *Students will learn about the fractions whose denominations are 10,100,1000 etc and their operations. *Students will learn about collecting of different numbers,words according to a rule.

HOLY CROSS SCHOOL, AGARTALA (Half yearly)
SYLLABUS for 2023

Class :V..... Subject : GENERAL SCIENCE

Theme : HUMAN BODY		
Learning Outcome : Children will be able to 1. Identify organs of the circulatory system in a picture/model. Locate position of each organ on the human body . Draw pictures of various organs of the circulatory system and label them.Describe functions of each organ and explain the process of circulation using scientific terms/words.differentiate between arteries and veins .Functions of blood .Discuss various ways to keep the heart healthy.		
Key Concepts	Name of the book : ESSENTIAL SCIENCE Lessons: 1	Life Skills
Revisit learning of class-iv on human body Circulatory system Organs/parts of circulatory system, their structure,functions (heart ,arteries,veins)functions of blood. Process of circulation through pictures,visual in simple terms(No technical knowledge to be given)	1.The circulatory System UNIT TEST -1 Half-Yearly Examination Ch : 1	Awareness about body

Theme : HUMAN BODY		
Learning Outcome : Childrens will be able to identify major bones of the human body and name them.Draw diagrams of major bones and name them,Describe functions of major bones of the human body.Locate major joints of the human body and discuss their functions.Give ego of other kind of joints in the human body.Identify food items that are calcium rich,following simple exercises to make bones and muscles strong.		
Key Concepts	Name of the book : ESSENTIAL SCIENCE Lessons : 2	Life Skills
*Skeletal system bones *Importance of bones muscles and joints for the body *Functions of bones, arms, legs, chestbones, skull ,jaw bone, skull backbones *Care of bones and joints food items to make the bone strong. *Importance of good posture and exercise.	2.The Skeletal system Half yearly Examination Ch: 2	*Awareness,importance of exercise and diet.

SYLLABUS for 2023

Class :V..... Subject : GENERAL SCIENCE

Theme : 3		
Learning Outcome : Children will be able to discuss various components of food required for healthy living. Give reasons of the need of a balanced diet. Enlist healthy and junk food items and differentiate between them. Suggest find out some ways to make diet healthier, develop awareness regarding adulteration of food items etc		
Key Concepts	Name of the book : Essential Science Lessons: 3	Life Skills
*Components of a balanced diet ,importance of eating a balanced diet. *Junk food meaning and examples adverse effects of eating junk food. *ways to make diet more healthy *Diseases related to food habits,life style ,anemia,diabetes etc. *Deficiency diseases,some common deficiency diseases (kwashiorkar marasmus , night blindness)	Food and Health Half Yearly Examination Ch: 3	*Critical thinking * Problem solving

Theme : 4		
Learning Outcome : Childrens will be able to identify major bones of the human body and name them.Draw diagrams of major bones and name them,Describe functions of major bones of the human body.Locate major jointsof the human body and discuss their functions.Give ego of other kind of joints in the human body.Identify food items that are calcium rich,following simple exercises to make bones and muscles strong.		
Key Concepts	Name of the book : ESSENTIAL SCIENCE Lessons : 4	Life Skills
*Revise parts of a flower *Androecium and Gynoecium *Bisexual and mono sexual flowers *Process of pollination *Some ways of pollination (Self and Cross pollination)	Pollination Half-Yearly Examination Ch : 4	*Ability to question

HOLY CROSS SCHOOL, AGARTALA (HALF YEARLY)
SYLLABUS for 2023

Class :V..... Subject :General Science

Theme : 5		
Learning Outcome : Children will be able to draw and label the male and female reproductive parts of a flower. Discuss the need for the process of fertilization of plants. Explain the process of fertilization in plants identify the different kinds of reproduction in plants identify various parts through vegetative reproduction taken place and give examples of each kind of seed dispersal need and significance of seed dispersal.		
Key Concepts	Name of the book : Essential Science Lessons : 5	Life Skills
**Process of sexual reproduction in Plant Reproduction plants fertilisation and formation of seed. *Dispersal of seeds (air water, animals) **Other was of reproduction in plants, vegetative reproduction from stem cutting (potatoes,onion,ginger) root(carrot) leaf(bryophyllum)	Plant Reproduction Ch : 5 *Revision test 1 Based on Ch 1-6 Half-Yearly Examination	*Ability to question

HOLY CROSS SCHOOL, AGARTALA (FINAL)
SYLLABUS for 2023

Class :V..... Subject :GENERAL SCIENCE

Theme : 7		
Learning Outcome : Children will be able to differentiate between plants and animals based on some features. Infer why plants can make their own food, cite examples of producers and consumers, explain the food chain taking examples as seen in daily life. Identify decomposers, scavengers and cite their examples. Discuss and explain causes of imbalance in nature, infer the effect of hunting, forest fires in the environment.		
Key Concepts	Name of the book : Essential Science Lessons : 7	Life Skills
*Plants as producers living thing as consumers, their examples. Simple food chains scavengers and decomposers Causes in imbalance in nature (some example ; hunting, forest fire)	Interdependence in living beings- Plants and Animals Ch: 7 Final Examination	*Interaction with the environment

Theme : 8		
Learning Outcome : Identify objects that produce pleasant and unpleasant sounds, recognize sounds produced by some common objects. Identify sounds produced by some animals, trees and fallen leaves; appreciate the importance of sound as a warning signal to save life. Enlist causes of noise pollution suggest some ways to reduce noise and discuss how loud noise affects health.		
Key Concepts	Name of the book : Essential Science Lessons : 8	Life Skills
*Sounds made by common objects (clock, whistle, settle etc) * Sounds made by living being, trees and fallen leaves *Pleasant and unpleasant sounds *Warning sounds (fire alarm, ambulance siren) *Harmful effect of loud noise *Ways to reduce noise pollution	Sound and Noise Ch: 8 Final Examination	*To analyse and investigate
